## TROUBLESHOOTING

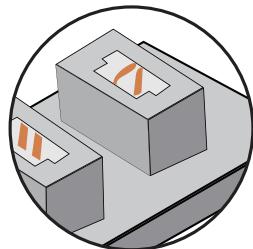

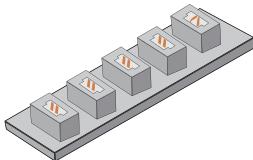

The small size of lighting accessories makes them susceptible to damage during installation, and the following issues are common causes of failure.

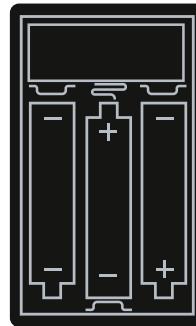

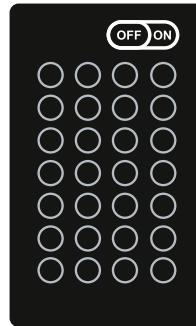

1. Ensure that the connectors are correctly installed as shown in the picture.

2. Check if the wires are disconnected or broken from the solder joints.

3. Check the internal pins of the connector sockets. The internal pins of a properly working connector port should be straight. If the small pins are bent, they may be considered faulty ports.

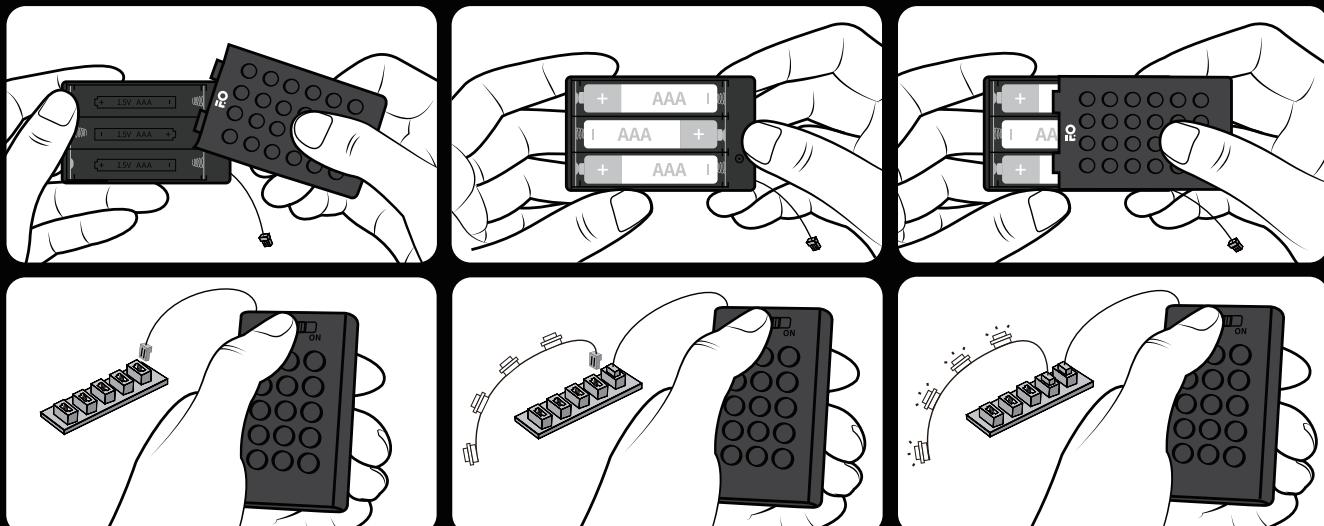

4. Check that the power switch on the battery box is on and that the "+" and "-" poles of the battery are correctly placed (using new batteries) and ensure that the upper and lower connections to the "+" and "-" poles of the power switch are installed correctly.

If you have checked each string of lights according to the guide above and the lights still do not light up, please contact our customer service for assistance.
