ABOUT FUNWHOLE

'FUNWHOLE' is a combination of the words "fun" and "whole", meaning "the whole fun of both day and night".

Founded in 2014, based on the desire to fully express the whole beauty of bricks (in day and night), FUNWHOLE is the world's first lighting bricks manufacturer.

FUNWHOLE is dedicated to the lighting bricks product, with a combination of bricks and lights. FUNWHOLE was birthed out of lights and bricks, allowing lights shine through your bricks and bring your night bricks to life.

As the pioneer to bring the first lighting bricks, FUNWHOLE was created to bring back brightness to the night world, making day and night whole with the lighting fun.

Engaged in building a creative brand, brick by brick, light by light, FUNWHOLE strives to bring fun and joy to millions of people.

FUNWHOLE creates more than bricks but also makes the lights shine through bricks, hoping every building brick lover can enjoy the beauty of lighting!

INSPIRATION

The product draws inspiration from American-style apartment buildings, integrating advanced near-future technology. Its exterior presents a retro aesthetic while its details and components exhibit a modern high-tech feel, embodying the clash between nostalgia and future in a street-level civilian structure—apartment. The product centers around the apartment building, depicting the stories of the surrounding environment and the building itself. Stories include backgrounds such as the plaza in front of the building, a secretive fried chicken joint, a hacker's haven, and a mechanical arm engineer, revealing intricate connections between them.

In this cyberpunk setting characterized by the collision of technology and backwardness, order and chaos, the cyber apartments feature:
Designs like trim and light strips symbolizing technology and order, including a bio-research tank on the third floor, a cybernetic doctor's lab, and negative-pressure doors in hacker rooms.
Elements representing backwardness and chaos such as underground surgical tables, littered garbage bags on street corners, damaged roads, and chaotic pipelines.

This product, through its unique design and narrative backdrop, offers a new interpretation of cyberpunk themes, showcasing imaginative future technology and engaging with the complexity of its environment.

Rex:
Rex is a mysterious figure who doubles as both the owner of a fried chicken shop and an underground doctor. By day, he runs a small eatery known as "Oil & Chicken Skin," while at night, he operates a clandestine medical clinic in his residence, performing limb replacements and offering anonymous treatments. Additionally, he excels as a motorcycle repair expert, making him indispensable and enigmatic within the city.

Keira:
There's a mechanic named Keira in this world. No one knows where she learned her exceptional crafting skills from, nor does anyone know who buys all the prosthetics she makes. Of course, Keira doesn't care. She's solely focused on her work, blending technology and artistry to create new mechanical limbs for those in need.

Max:
In this cyber world, there's a cyber lunatic named Max. His chip account seems to have been hacked, leaving him penniless. In moments of despair, he often kicks the vending machine, though it never dispenses any drinks.

Mark:
There's a male hacker known as Mark. He sits in his studio, fingers flying over the keyboard, eyes fixed on a single monitor. Hacking into others' chips is child's play for him as he efficiently maneuvers computers, mastering various cybersecurity techniques from cracking passwords to breaching firewalls. Mark is revered in the hacker community for his unparalleled skills and technical prowess, making him a shining star in the virtual realm.

Jack:
In this bustling city, there's an ordinary citizen named Jack. He relies on the bus for his daily commute, but its punctuality isn't always reliable. Sometimes, Jack finds himself facing the possibility of being late. Despite this, he remains optimistic and patient, navigating through these small challenges of urban life.

Amy:
There's an ordinary citizen named Amy who frequents the fried chicken shop by the station. Today, with fewer customers around, she has the chance to chat with the owner.

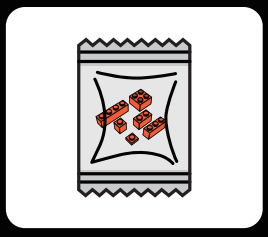
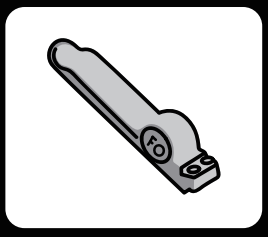
WHAT'S INCLUDED

Please check and make sure you get all the items listed below.



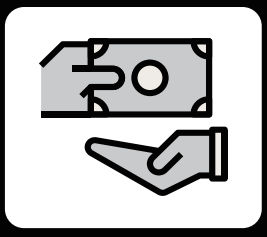
Building Bricks

LED Light Kit



Brick Separator

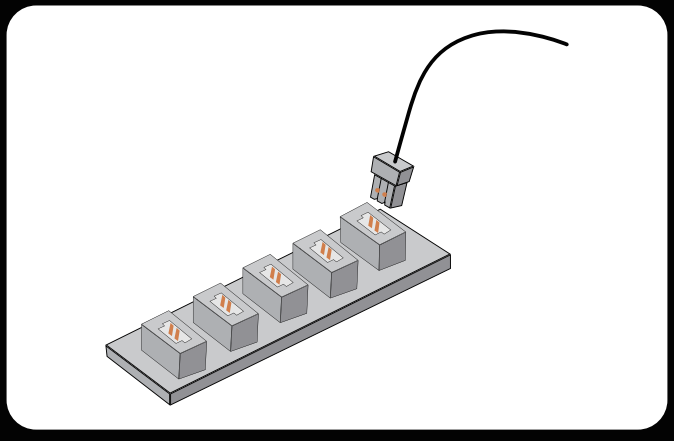
User Manual



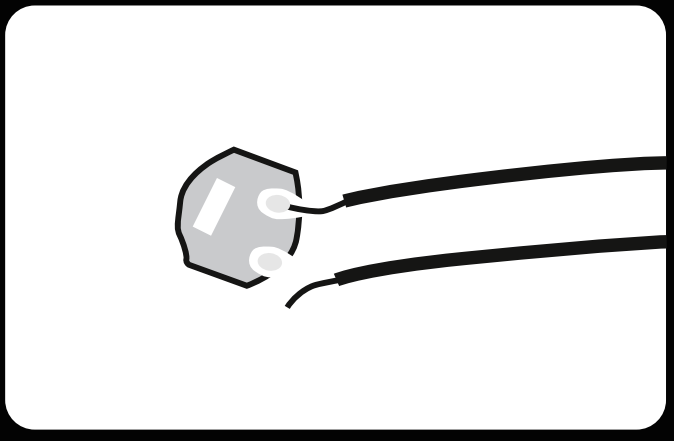
Service Card

TROUBLESHOOTING

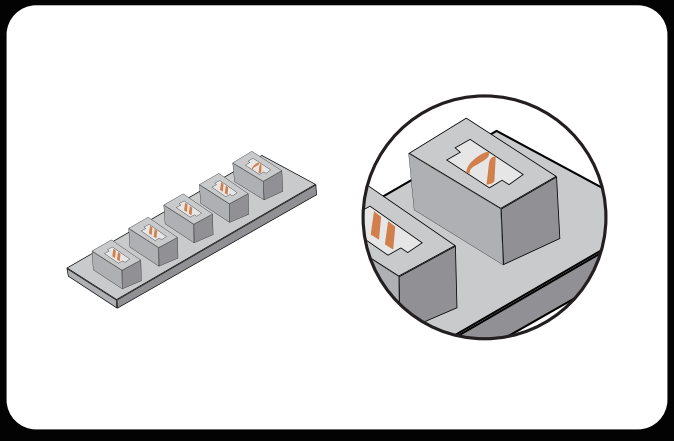
The small size of lighting accessories makes them susceptible to damage during installation, and the following issues are common causes of failure.



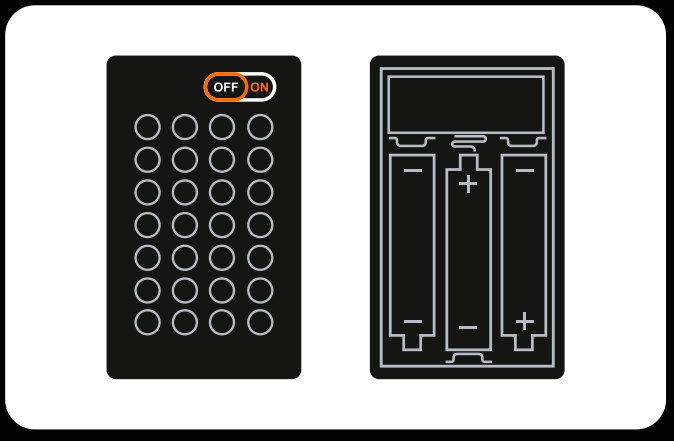
1.Ensure that the connectors are correctly installed as shown in the picture.



2.Check if the wires are disconnected or broken from the solder joints.



3.Check the internal pins of the connector sockets. The internal pins of a properly working connector port should be straight. If the small pins are bent, they may be considered faulty ports.

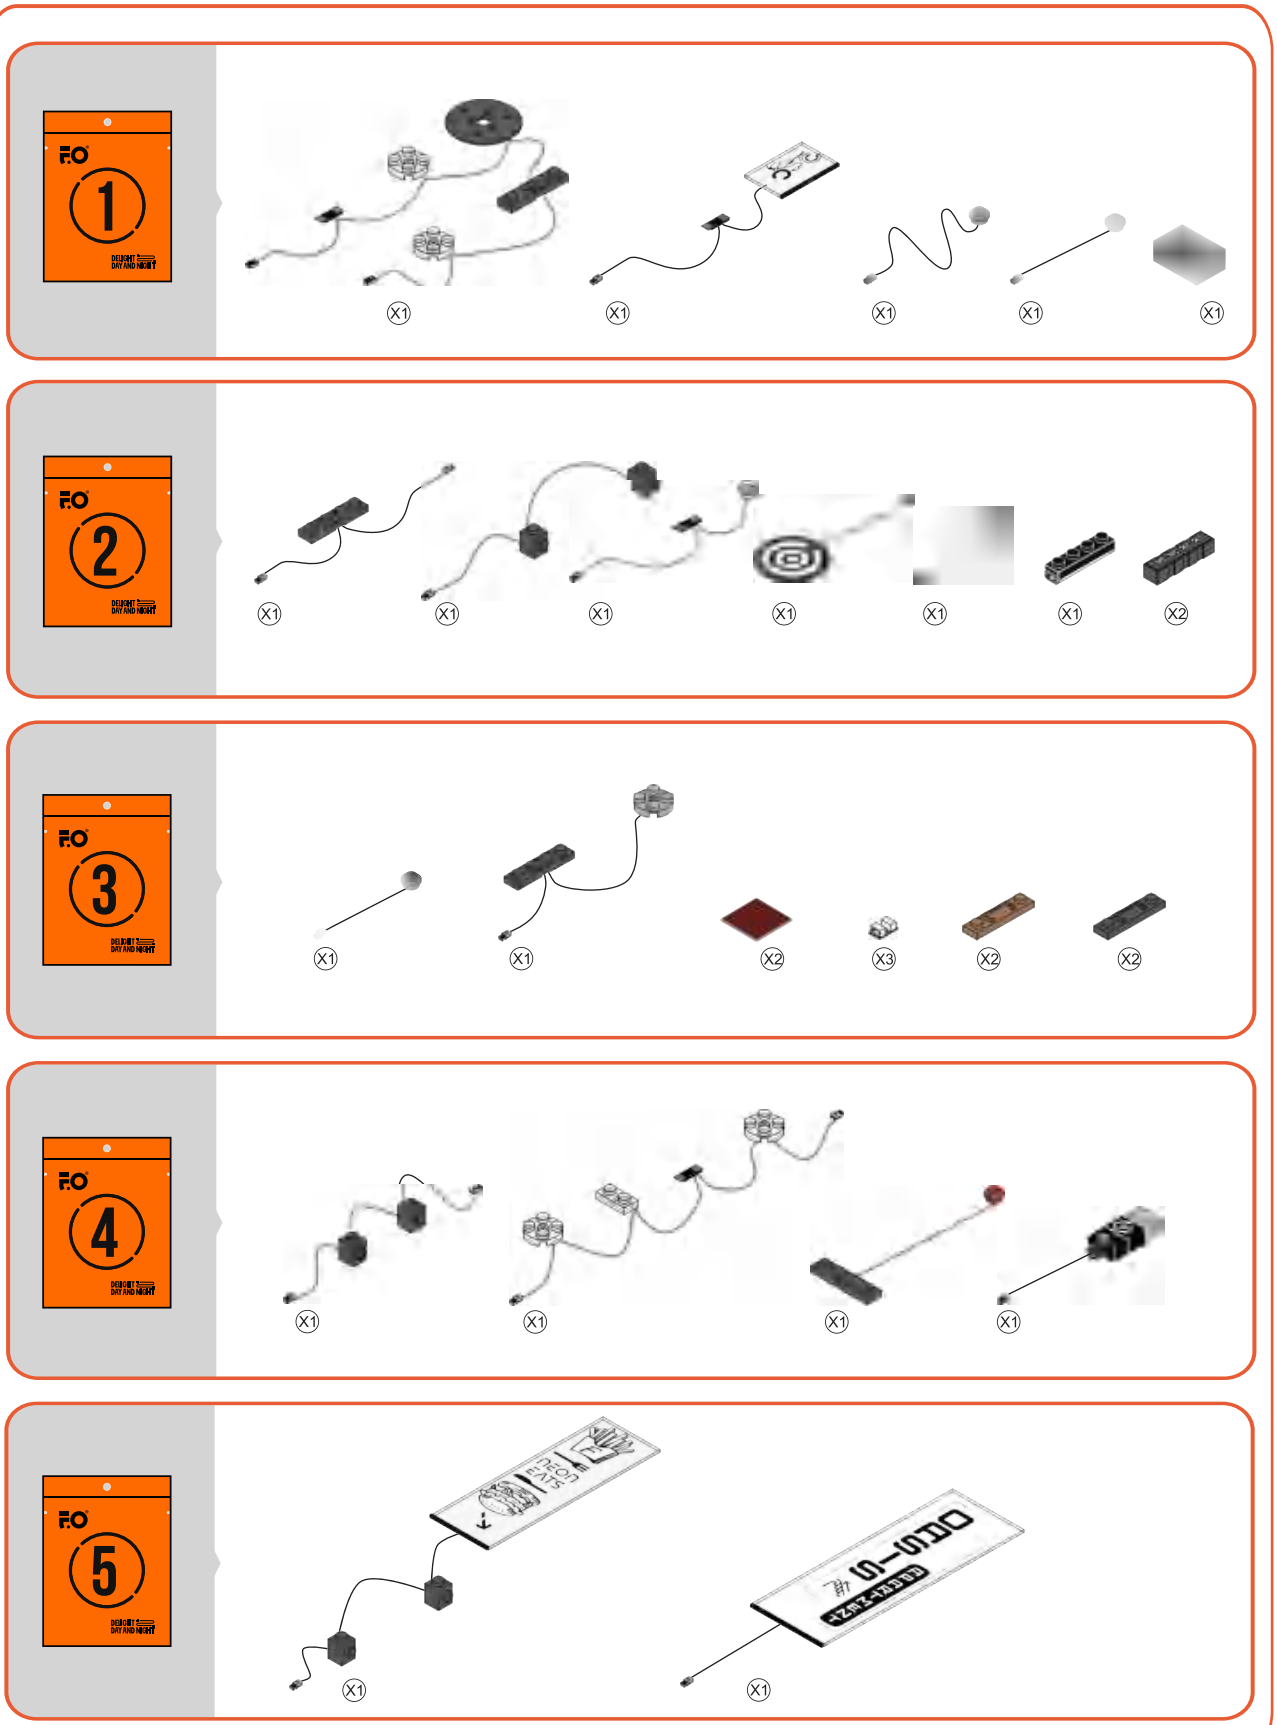


4.Check that the power switch on the battery box is on and that the "+" and "-" poles of the battery are correctly placed (using new batteries)and ensure that the upper and lower connections to the "+" and "-" poles of the power switch are installed correctly.

If you have checked each string of lights according to the guide above and the lights still do not light up, please contact our customer service for assistance.

LED LIGHT KIT PACKAGE LIST

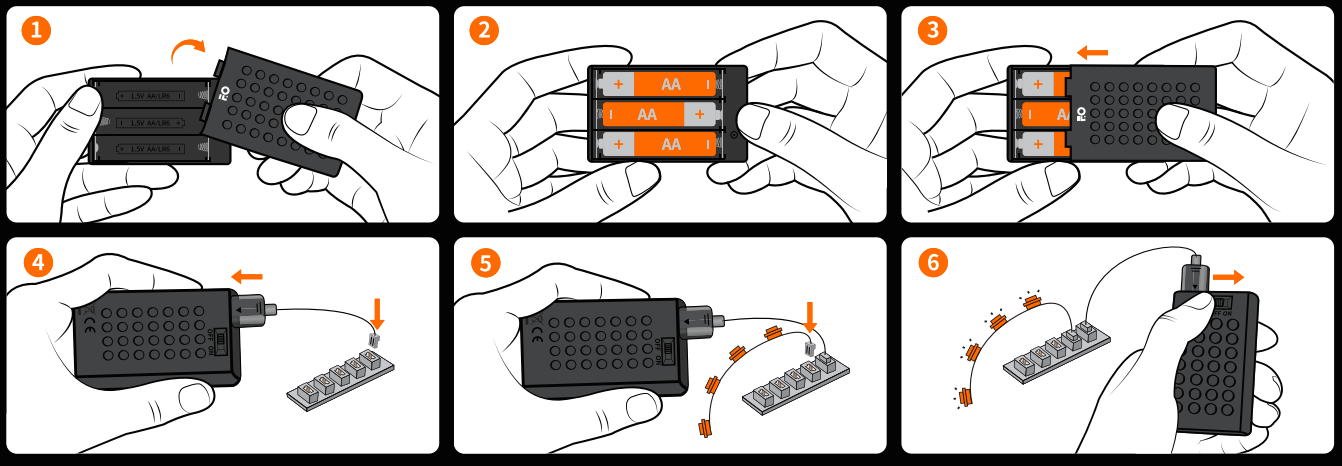
Please check and make sure you get all the lighting accessories. Contact us if there are any missing components.



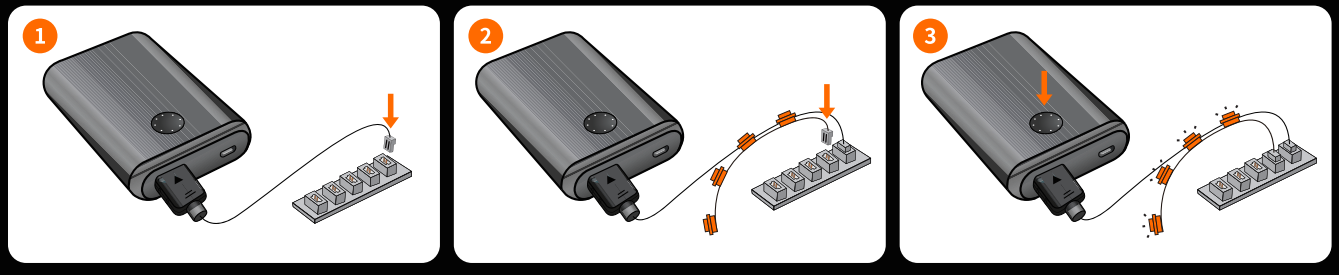
Note: when installing, don't pull it hard, bend it or shake it to avoid damage. The supply voltage should be below 5V, and the button battery holder voltage can be below 6V. Not for children under eight.

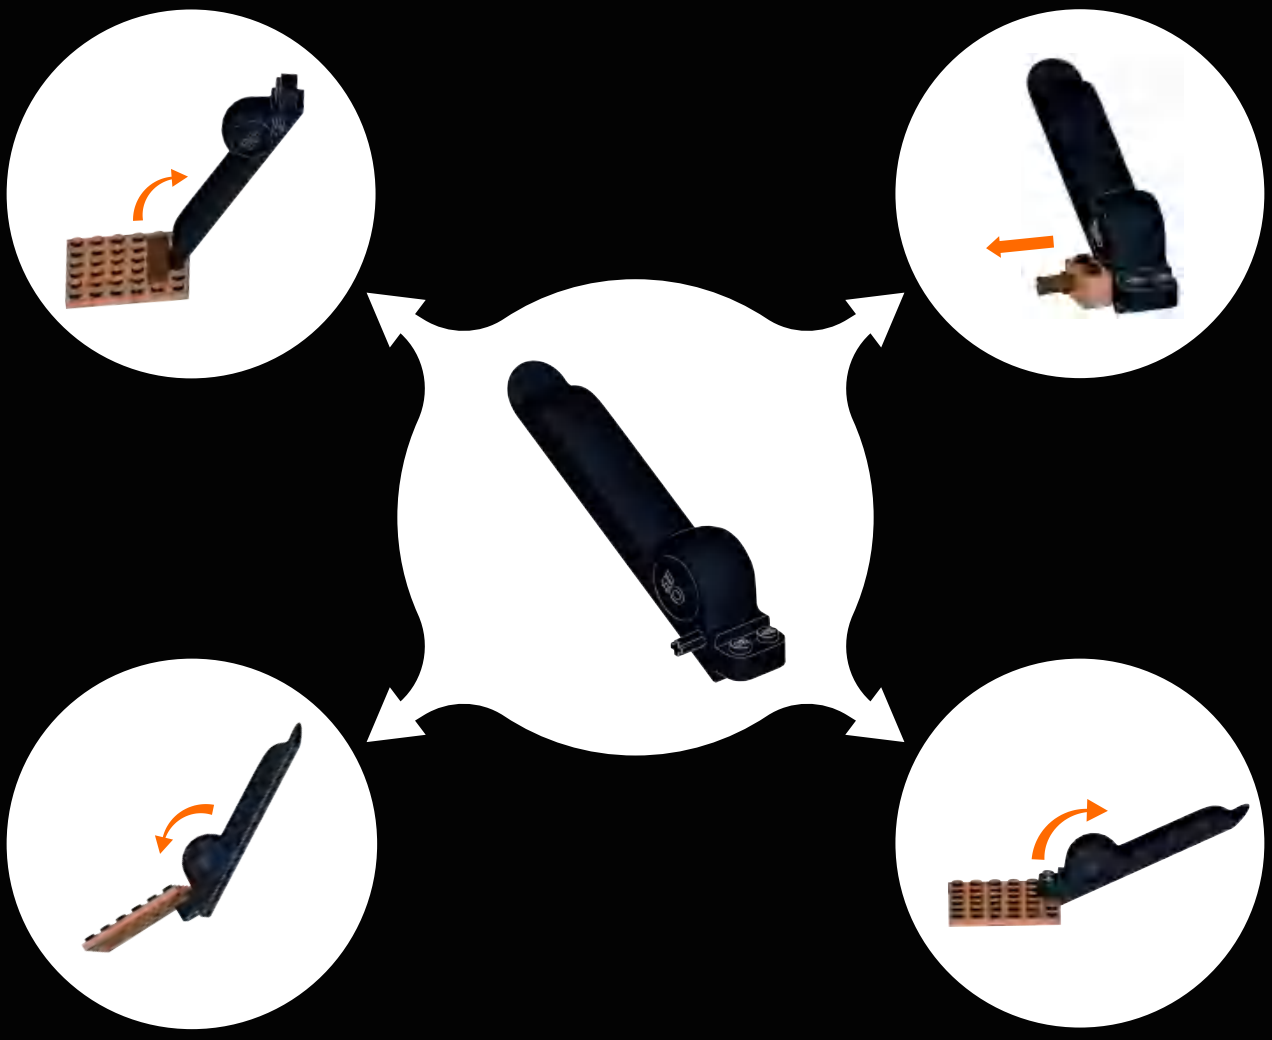
SAFETY PRECAUTIONS

1. Before use, please make sure to check the voltage to avoid damage to the product and potential safety hazards.
2. The lights in the product are not replaceable. If they are damaged or not lighting up, please refer to the troubleshooting section or contact our customer service for assistance.
3. Avoid pulling on the light connection wires as this may cause damage.
4. Do not expose the product to water as it may damage the product.
5. Please read and follow the instructions carefully during building to ensure a good building experience.
6. This product doesn't include batteries or power banks. Please prepare your own batteries or power banks to power the LED light kits.
7. While there are several models available, the operating procedures and mechanism for FO expansion boards and battery boxes remain consistent. For inquiries, we encourage you to reach out to our customer service team for assistance.
8. Certain products are accompanied by a Type-C cable designed exclusively for use with the respective product. The USB end of the cable connects to a 5V DC power source, while the Type-C end connects to the Type-C expansion board.Please disconnect the input power when not in use for an extended period.
9. Do not simultaneously use multiple power sources to supply power to the LED light kits.



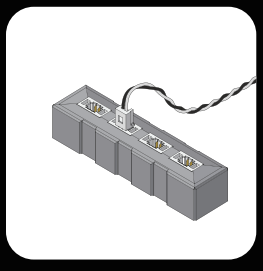
Battery box name: No. 5 building block battery box Battery type: AA*3 (No. 5) Battery rated voltage: 1.5V



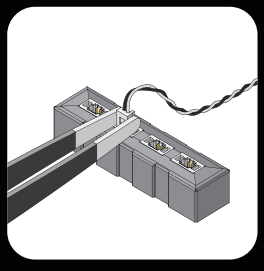


HOW TO UNPLUG THE CONNECTOR

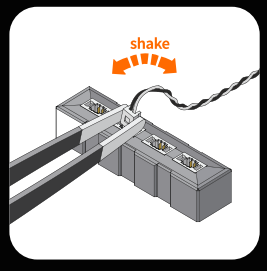
Note that the new connector will be tight. To remove it, gently shake it from side to side until it loosens, then pull it out.



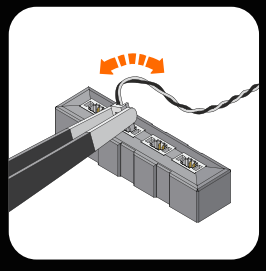
1.The connector is installed, as shown in the picture.



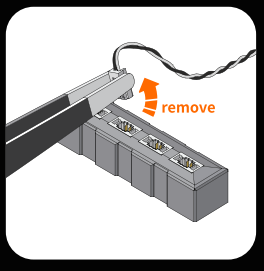
2.Use tweezers to hold the connector on both sides.



3.Gently shake the connector from side to side.



4.When the connector is tight, it will take several shakes to loosen it.



5.Remove the connector.

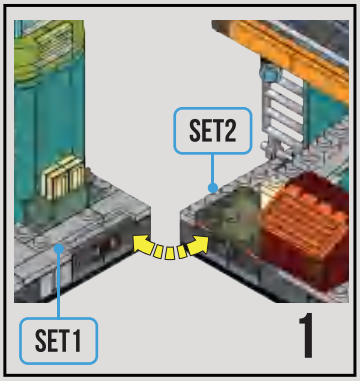
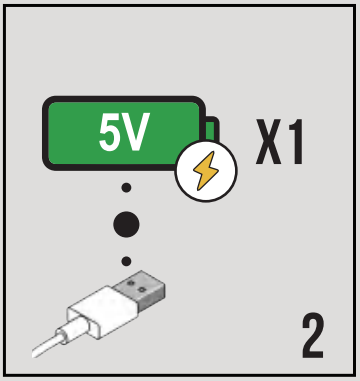
MULTIPLE SET COMBINATIONS

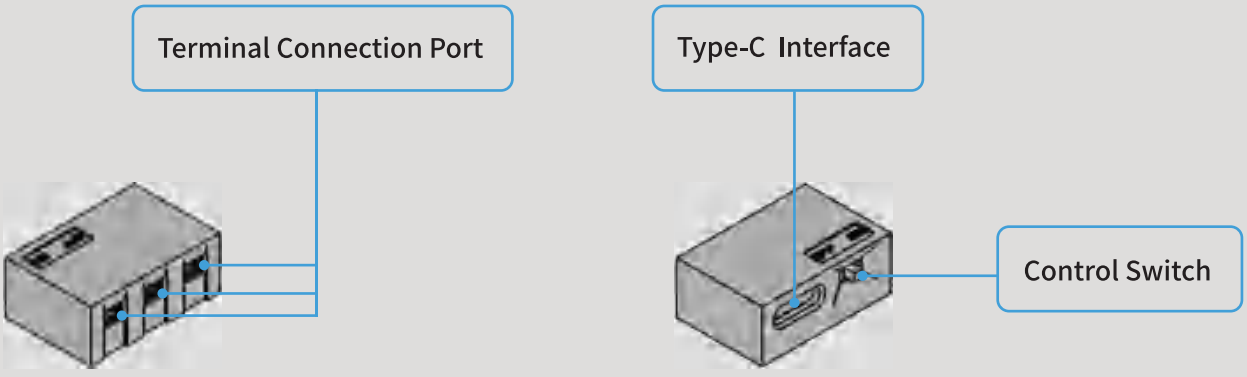
When you have multiple sets that can be connected via a side power connector, please ensure that a single power source is used when combining them.





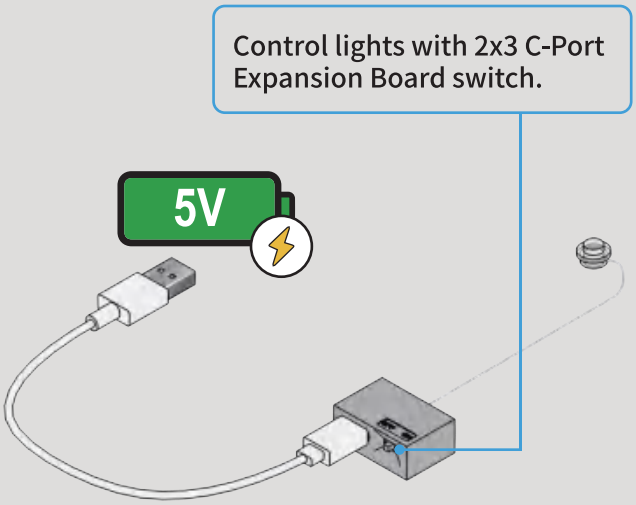
2X3 C-PORT EXPANSION BOARD

We've launched a new lighting accessory called the "2x3 C-Port Expansion Board" .In addition to the standard functions of an expansion board, the added Type-C interface and control switch make power supply more convenient, just like charging a mobile phone.

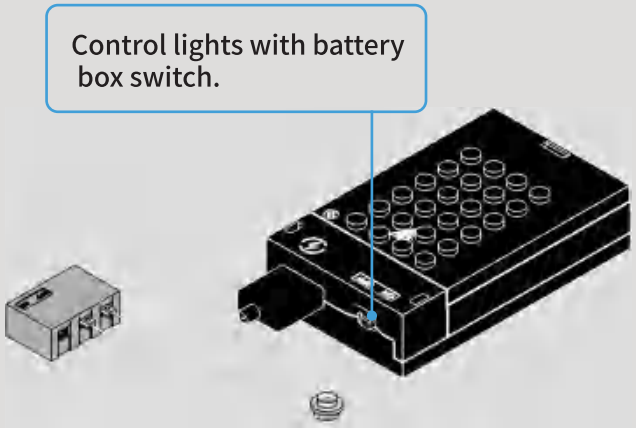


The 2x3 C-Port Expansion Board supports two power supply methods, both capable of illuminating the lights. You can choose one according to your needs.

Method 1



Method 2



*In the assembly guide, Method 1 will be primarily used. but you can also choose Method 2 without affecting other steps.

LED LIGHT KITS INSPECTION GUIDE

1、To enhance your experience, please check the LED Light Kits according to the guide before starting assembly.
2、After inspection, please return the LED Light Kits to their original bags for future use.
3、If any issues occur, please contact customer service.
