# INSPIRATION

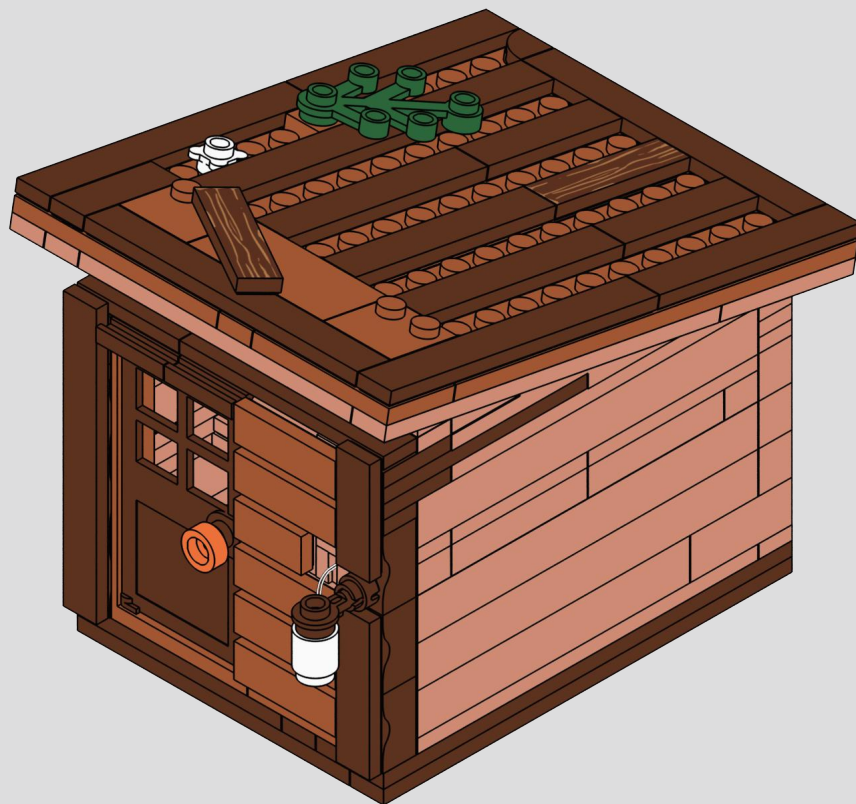

The design of the Bee Farm focuses on adults' interest in the authentic beekeeping process. The set accurately replicates the details of beekeeping, including the hive structure, bee behavior, and honey extraction process, providing players with a genuine experience. Natural elements are cleverly integrated, such as nectar plants like black locust and *Astragalus sinicus*, as well as fireflies visible at night, creating a vibrant natural environment that enhances player immersion.

Beekeeper Rose deeply loves nature, and her beekeeping farm is situated in a tranquil location away from the city. Today, she has brought her nephew, Bubbles, who is on vacation, to her farm. Mischievous Bubbles angered the hardworking little bees and got stung, causing his eye to swell up. However, he seems unbothered, possibly because his love for the bees outweighs the minor pain—he has never had the chance to interact closely with these lovely creatures in the city.

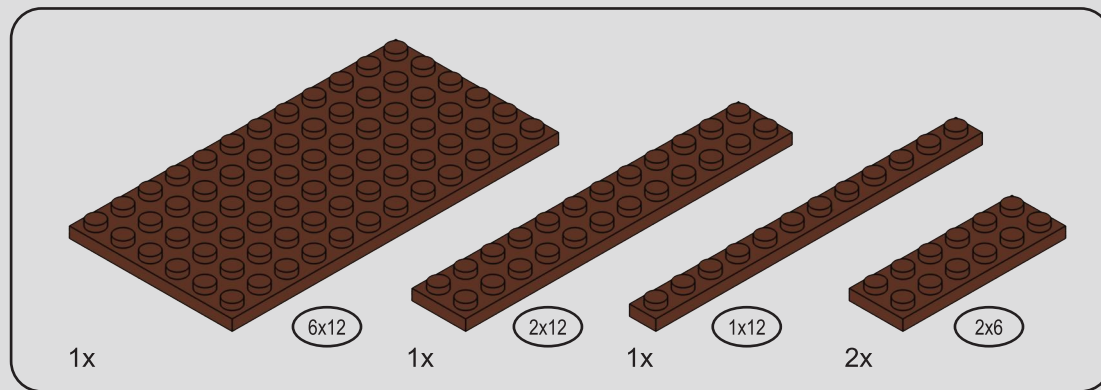

Rose looks at her nephew with both worry and affection. Suddenly, her expression changes as she spots an unexpected guest trying to steal honey...
