You might recognize me! Ever since I bought this gold mining map from Mr. George Carter, the general store owner, I've been following this winding river, believing it would lead me to my fortune. When we found this little hill, we blasted it open and hit gold! The trolley's ready—tomorrow's the big day!

TROUBLESHOOTING

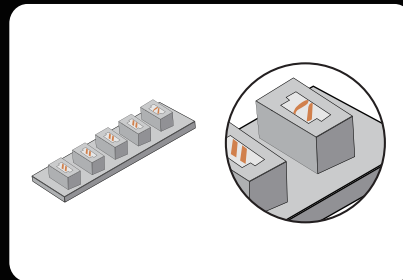

The small size of lighting accessories makes them susceptible to damage during installation, and the following issues are common causes of failure.

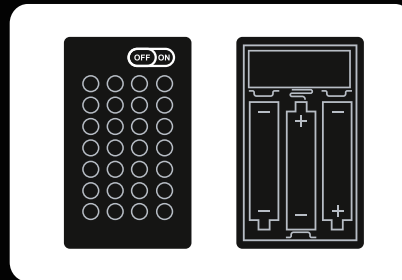

1.Ensure that the connectors are correctly installed as shown in the picture.

2.Check if the wires are disconnected or broken from the solder joints.

3.Check the internal pins of the connector sockets. The internal pins of a properly working connector port should be straight. If the small pins are bent, they may be considered faulty ports.

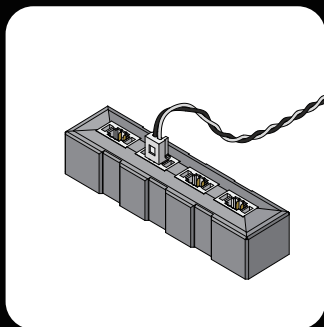

4.Check that the power switch on the battery box is on and that the "+" and "-" poles of the battery are correctly placed (using new batteries) and ensure that the upper and lower connections to the "+" and "-" poles of the power switch are installed correctly.

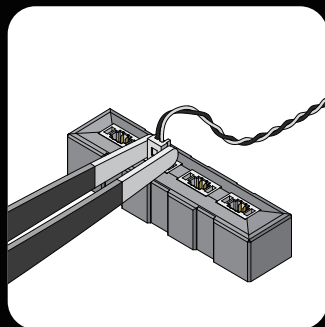

If you have checked each string of lights according to the guide above and the lights still do not light up, please contact our customer service for assistance.

HOW TO UNPLUG THE CONNECTOR

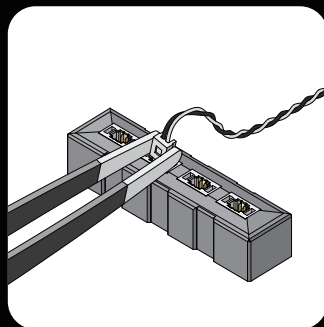

Note that the new connector will be tight. To remove it, gently shake it from side to side until it loosens, then pull it out.

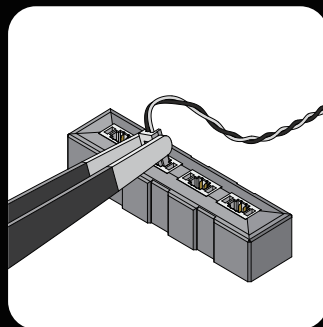

1.The connector is installed, as shown in the picture.

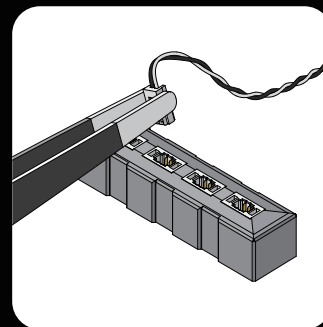

2.Use tweezers to hold the connector on both sides.

3.Gently shake the connector from side to side.

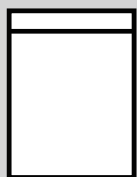

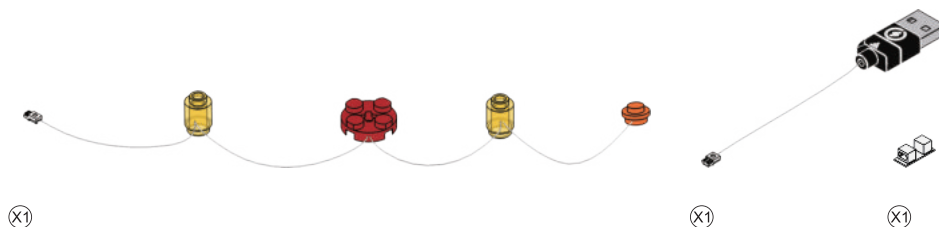

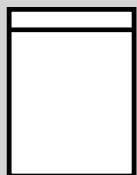

4.When the connector is tight, it will take several shakes to loosen it.

5.Remove the connector.
